

AMENDMENTS TO THE ABSTRACT

The Abstract of the Disclosure current of record has been replaced with the following new Abstract of the Disclosure:

Abstract of the Disclosure

A radio communication network includes: a unit adapted to allocate radio resources to a plurality of users, where a user is allocated a certain transmission capacity; and a unit adapted to determine a utilization factor relating to said transmission capacity, wherein, the means adapted to allocate radio resources are adapted to allocate the radio resources depending on said utilization factor, and the unit adapted to determine said utilization factor include a unit adapted to determine how much of said transmission capacity is actually used by said user, and the unit adapted to determine the utilization factor are adapted to detect time intervals, in which the user does not exploit the transmission capacity allocated to him.
